## **Instabase in the Cloud vs. Old Instabase**

<b>Item</b>	<b>Old Instabase</b>	<b>Instabase in the Cloud</b>
Data integrity	May or may not be using latest data	Always using latest data
Data uniformity	Users may be using different versions of the same data	All users using the same data
Instabase maintenance (user)	Have to do manually. Download and install revised Instabases	Automatic. Data updated as soon as supplier makes changes! Nothing to download or install!
Data change notification	Need to subscribe to Instabase to be notified of changes. If changed, need to download and install modified Instabases	Automatic updated
What data has changed?	No easy way to determine	Supplier could provide 'favorite' which loads changed or new files  Future – AGi32 automatically check for updates for files used in current job file
Ability to save search parameters	Saves last search only	Can save multiple search filters
Ability to create a 'favorites' filter	No. Collections can be used for this	Yes
Ability to share search parameters	No	Yes
Ability to share favorites	No	Yes
Ability to load and view across multiple suppliers and Instabases	No	Yes
Ability to select and load more than one file into AGi32 at a time	No	Yes. This can be a big time saver!
Extended search parameters	No	Yes, supplier can add "Custom Search Keywords" (CSK's) to files
Must be connected to access data	Yes - To download and check for updates No - After Instabase downloaded	Yes. Can access downloaded data when offline
Ability to use as primary photometric file storage	No, only usable by AGi32 and Toolbox	Yes
Reporting	Total number of downloads, no info about individual files	Detailed info about individual files
Modify/enhance interface without updating AGi32	No	Yes
