

## Software Award Announcement

### **Lighting Analysts, Inc. and AGi32 version 14 win Dark Sky Defender Award for MLO Education.**

*Littleton, CO USA – December 20, 2013*

Lighting Analysts, Inc., a world leader in calculation and visualization software for lighting design professionals, is proud to announce that the latest developments in the software program AGi32, version 14, have been awarded the “Dark Sky Defender” award from the International Dark-Sky Association.

AGi32 version 14 is helping to defend night skies with its compelling enhancement that will provide users with LEED v4 SSc6 “Light Pollution Reduction” compliance report added to the Obtrusive Light command. “The new LEED (version 4) requirements for light pollution reduction will be similar in some ways to the IES/IDA Model Lighting Ordinance,” says David Speer, Director of Sales and Marketing for Lighting Analysts. AGi32 version 14 has the limitations for vertical illuminance and upright built into the previously released Obtrusive Light command, so users can easily evaluate designs on a Pass/Fail basis, and a formatted compliance report is provided! “AGi32 covers all of the bases in terms of the evaluation of obtrusive light: MLO, CIE-150, AS-4282 and now LEED’s new standard,” says Speer. A complete summary can be found at [www.agi32.com](http://www.agi32.com), where prospective users can download a free 30-day trial license and give AGi32 a try.

### **About Lighting Analysts**

Founded in 1984, Lighting Analysts Inc. ([www.agi32.com](http://www.agi32.com), [www.elumtools.com](http://www.elumtools.com)) is a world leader in lighting design software.
