Radiosity: A Programmer's Perspective

Radiosity: A Programmer's Perspective was published in 1994 by John Wiley & Sons Limited. The copyright reverted to byHeart Consultants in 2002, and is now freely available on request from byHeart Consultants Limited.

The manuscript has been reformatted for printing on 8-1/2"x11" paper, and is in Adobe Acrobat PDF – see *Radiosity – A Programmer's Perspective.pdf*.

The Helios Version 1.00A C++ source code included in the book has been upgraded with an improved user interface, and is now included with the WinZip file as *Helios Version 1.03B* in the directory *Helios3B*. It compiles under Microsoft Visual C++ V7.0, and there is only one file that is Windows-specific.

All of the material included in the WinZip file is copyrighted. However, the *Helios Version 1.03B* source code may be freely copied, redistributed, and/or modified for personal use only as long as the copyright notice is included with all source code files.

Yours,

Ian Ashdown, P. Eng., LC, FIES
President
