For Immediate Release

### **FlashZC software making customers happy online at Daybrite and Crescent-Stonco**

The FlashZC web-based zonal cavity calculator has been live on the websites of luminaire manufacturers Daybrite and Crescent-Stonco for several months now and the feedback is very positive. "Everyone we have shown it to has been very impressed", says Phil Henry, Vice President of Marketing for Crescent-Stonco. "We have been introducing it to distributors and contractors with the goal of reducing the number of simple projects handled by our applications department."

Similarly, Clarke Penley, Manger of Applications Engineering at Daybrite says client, rep and distributor access to indoor layout information on the web is redirecting simple requests away from his department, allowing them to focus on more complicated projects. "It has really taken those last minute, gotta have it requests and put them easily within the capabilities of the client, we are very pleased".

Please take the opportunity to visit these progressive websites and have a look for yourself:

Daybrite/Capri/Omega: (titled LightCalc) <http://www.daybrite.com/lightCALC/> - Login and go!

Crescent-Stonco: (titled QuickEst) <http://www.crescentlighting.com> – Browse their product line and select the QuickEst link at any product of interest.
